# Phase 1 Project Templates and Examples

Microsoft trying its hand at movie making!!!

Microsoft is aiming to create new movie studio. They require recommendations on the type of movies doing well at Box office. Recommendations include actionable insights to help Microsoft with new movie studio.

upon sifting through the datasets, I noticed that, out of ten different tables in CSV and JSON format, I can use five tables to extract desired data.

bom.movie\_gross.csv.

imdb.title.crew.csv.

imdb.title.principals.csv.

imdb.title.basics.csv.

imdb.name.basics.csv.gz.

applying merge joint and some methods, I could come to my three recommendations.

Recommendation 1 - Movie Genres

Recommendation 2 - Best Directors to work with

Recommendation 3 - Best Writers to work with
